**You work hard to obtain your data, why not learn the best way to show it? Join us to learn the essentials of data visualization.** Presentation tools have come a long way in recent years, and give us the ability to tell new and insightful stories with them. We will begin the evening with a brief overview of the building blocks of data visualization and then explore some visually appealing examples of data and talk about new concepts in data display. Our panelists will discuss effective applications within cancer research, life sciences, and other science and technology fields.

### Our Distinguished Panelists:
