

ANNOUNCING THE 2016-2017 GROUP MENTORING PROGRAM

Need career advice?

Need help with at-work conflict?

Need tips to balance work and family?

Then get advice from experienced women scientists by joining our Group Mentoring Program

Sign up now to become a Mentor or Mentee

“Group Mentoring supported me with constructive and professional advice to learn how to manage work situations and think through my scientific career goals and skills. As a bonus, it’s a lot of fun!”
participating mentee

What is an AWIS Group Mentoring Program?

A Mentoring Group is a party of 5-7 women scientists committed to meeting monthly to support one another with advice, encouragement and information. Each group will be coordinated and fostered by at least one experienced mentor and one connector.

Who will be in my group?

The Seattle AWIS mentoring committee will review submitted surveys and match you with a group based on your interests and career goals.

What will we talk about? Are we just going to sit around and complain?

The mentoring group is an approach for sharing frustrations with peers but the focus is on career growth and problem solving in a supportive and fun environment. Seattle AWIS will provide you with a source of ideas and articles to help start conversation. All participants should be willing to give and get professional and personal support from other talented women in the scientific community. Mentors will help guide and promote productive discussions in the group.

How do I join the Seattle AWIS Group Mentoring Program as a mentee?

- You must apply to the program online by filling out the [form linked here](#).
- You must be a Seattle AWIS chapter member or pay a \$20 fee* to join the mentoring groups

*Mentoring fee should not be paid until you receive confirmation that you have been placed into a group

Space is limited!

Deadline is October 1, 2016
