

# THE EDUCURIUS EXPERT NETWORK™

## THE POWER OF MENTORSHIP

Most of us can name at least one inspirational adult who made a difference in our lives. But not every young person has access to such role models. At Educurious, we want every student to have a network of support from adults who have blazed their own trails to successful careers.

Through The Educurious Expert Network™, students receive ongoing personal feedback on their work from carefully matched subject matter experts who connect what they're learning in school to professional roles and career paths.

Together with our project-based learning and technology, The Educurious Expert Network is core to our proven integrated solution that captures the imagination and interest of students and connects them to a wide world of possibilities. Everyone benefits: Experts are able to give back in meaningful, inspiring ways, and students have the opportunity to build powerful networks with a transformational impact on their learning experiences and their futures.

### GOALS OF THE EDUCURIUS EXPERT NETWORK

Students deepen their engagement in school, develop college- and career-ready skills, and discover a wide array of career paths. **Professionals, corporations and associations** have a scalable way to participate in the education system and help prepare our nation's next generation.

## HOW THE NETWORK WORKS

When experts join the network, they complete a screening process that enables Educurious to match them with students based on subject matter expertise, geographic location and student requirements. Students and experts work together on our online social network, where they collaborate on projects of mutual interest. This creates a long-needed connection between school and authentic work in the world.

### HOW STUDENTS CONNECT

By connecting students in school with experts at work in the world, we give them an invaluable window into professions. Students are able to explore an expanding universe of career paths and possibilities while developing skills, knowledge and relevance in their coursework.

## JOIN US

Join our movement to actively participate in a solution that is changing the way students experience school. Together we can prepare our nation's next generation for success in work and life as active, informed citizens in an ever-changing world. Watch our video to see The Educurious Expert Network in action and hear from our students on how our experts support deeper, more engaged learning: <http://tinyurl.com/adqky3z>
