

The Seattle AWIS Monthly Programming Series presents:

Data Science in Biology

Wednesday – January 17th, 2018 – 6:00 PM

Fred Hutchinson Cancer Research Center – Pelton Auditorium

1100 Fairview Ave. N., Seattle, WA 98109 – Free visitor parking

6:00 PM - Networking and Refreshments

6:30 PM - Introductions and Program

7:45 PM - Networking and Dessert

Big Data is becoming one of the most significant advancements of the last decade.

With data showing the ability to contribute to everything from election predictions to transportation services, extracting useful information from extremely large datasets is transforming multiple scientific fields, and the biological sciences are no different. Billions of data points on genes, proteins and other molecules, as well as large volumes of patient data, can give us precious insights to better predict and treat disease. Over the next decade, discoveries through the use of computational models will allow us to leverage that data into meaningful information, contributing to the improvement of healthcare globally.

Our Speaker

Lara Mangravite PhD
President of Sage Bionetworks

Seattle AWIS programs are FREE.

All are welcome – members, non-members, women and men!
