

SEEKING POST-DOCTORAL APPLICANTS FOR THE FRED HUTCH DR. EDDIE MENDEZ POST-DOCTORAL SYMPOSIUM

At Fred Hutch, we believe that the innovation, collaboration, and rigor that result from diversity and inclusion are critical to our mission of eliminating cancer and related diseases. We are committed to doing the internal work to increase our awareness and to improve our practices so that we model the highest standards of innovation. Accessing and elevating the full talent pool is a required aspect of this effort. As a part of this effort, we are committed to developing and investing in excellence in biological sciences so that it is more equitable and representative of the vast talent pool.

Among other endeavors, we have launched the [Dr. Eddie Mendez](#) Post-doctoral Symposium. This symposium is dedicated to recognizing six underrepresented minority post-doctoral scholars from across the nation¹

During this first year of the symposium, we are intentionally casting a broad net and inviting applications from underrepresented minority post-doctoral scholars in any cancer research-related field spanning laboratory, clinical, and population sciences.

Application

All applications must be received by February 1, 2018. Awardees will be notified by March 18, 2018. Applicants may submit their [application here](#).

Please submit the following:

- CV with links to publications
- One paragraph summary of the research you would present
- Personal statement (1/2 page)
- Identify the division at Fred Hutch that you would be most interested in joining as a faculty member
- *Optional:* Letter of Recommendation

¹ Definition of underrepresented minority is aligned with the NIH's definition: individuals from underrepresented racial and ethnic groups (African American, American Indians and Alaska Natives, Hispanics, Latinos, Native Hawaiians, other Pacific Islanders) and individuals with disabilities.
